PROFILE

I am currently working at Nokia as a Test Engineer. With technical background and hands-on experience I can bring valuable expertise and contribute to the success of the team. In my spare time I am an avid chess player.

EXPERIENCE

WORKING STUDENT - TEST ENGINEER

 Nokia Solutions and Networks

03.2023 - present

- Creation of test scenarios, supervising them, gathering logs and analyzing the results
- Creation of scripts and automation programs
- Automatic, manual, regression and unit tests
- Configuration and maintenance of test equipment
- Conducting multiple tests requiring knowledge of 5G network e.g. beamforming, slicing, massive MIMO, network modes and network features

INTERN AS&UX ENGINEER

•  Aptiv Services

04.2022 - 07.2022

- Implementation of the code to support and automate hardware simulations
- Running hardware simulations and their supervision
- Generating simulation progress reports and error analysis

PROJECTS

FLASK AUTHENTICATION APP

A program using Flask framework and SQLAlchemy database, enabling users to create accounts, log in, and store notes within the database.

DJANGO PORTFOLIO WEBSITE

Website created with Django Framework, HTML and CSS from which you can get to know me better.

SUDOKU SOLVER WITH GUI

A program capable of finding answer to any solvable sudoku grid. Program has GUI and allow user to try to solve it while checking for correctness of input.
